AMATEUR RADIO FIELD DAY

JUNE 24-25, 2017

The Big Thunder Amateur Radio Club (BTARC) invites you to Field Day—a 24-hour communication marathon. Local "hams" will be demonstrating amateur radio operations under simulated emergency conditions from 1:00 PM Saturday to 12:00 PM Sunday. Field Day is a serious test of skill and a contest for fun, too! Local hams will rack up points as they try to contact as many other Field Day stations across the country as possible.

- Discover some of the exciting areas of Ham Radio. Voice, Morse code, Computer to Computer, Hams use them all.
- We will gladly help you get started in Ham Radio.
- Observe how ham operators set up emergency communications in times of disaster, when normal communications systems are overloaded or unavailable!

The BTARC Field Day radio stations can be joined in action at Edwards Park, 15339 Rt. 76 in Poplar Grove just north of Route 173 on Route 76. Please contact Matt Tracy 224 (622-9001) or see www.wa9gwm.org for further information. Talk-in 147.375 +600 100hz PL
